MANOEUVRABILITY

SHALLOW DRAUGHT

EFFICIENCY

This tuna farm utility vessel fulfils a number of roles in the Southern Blue-fin Tuna Farming operation in South Australia. Set up specifically for diver support, the versatile catamaran also assists with maintenance, anchor handling and crew transfer. One key advantage with waterjets is the low risk of entangling nets and ropes, and with blue ARROW controls the skipper has precise control of the vessel in all conditions.

No. 452
